KSIV SEER2 SERIES

KLIMAIRE®

Mark of Superior Quality

AHRI CERTIFIED www.ahridirectory.org

ETL LISTED C US

DC INVERTER TECHNOLOGY

Eco Friendly

Product Overview

Klimaire Ductless Mini-Split KSIV Series is the most recent addition to Klimaire's line of high-performance wall mounted mini split systems. This series offers up to 19 SEER efficiency with a full range of features that make it the smartest choice when you look for a reliable heating or cooling source. It could be used as the primary or as a supplement to your current heating or air conditioning system, with an outstanding design at an outstanding value. The DC inverter variable speed technology of these units enables low ambient cooling and heating down to 5º F, with its turbo heating and cooling, and the system will auto regulate the compressor to deliver the right amount of heating and cooling to keep the room temperature steady. This technology can generate energy savings of up to 49% compared to standard on/off systems. Finely tuned climate control offers the added benefits of less system wear and tear and whisper quiet operation. The standard infra-red remote control displays informative diagnostics of the performance of the system, it is user-friendly and can be programmed to your preferred settings.

What Klimaire brings you …

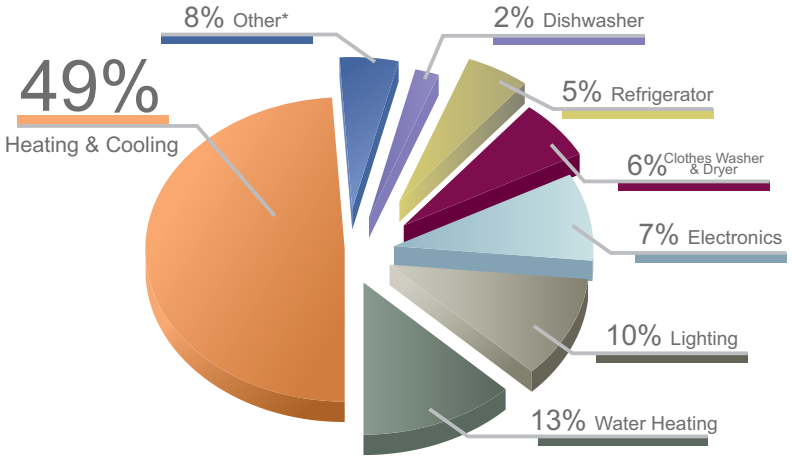
We have been in the Ductless Mini-Split business for over 25 years, Klimaire manufacturing maintains the highest standards of quality and reliability with ISO 9001 and ISO 14001a. Our products have proven their endurance and resiliency over time, operating in 70 different countries. All products are ETL certified and AHRI registered. Klimaire products exceed industry standards for energy efficiency and employ innovative technology to achieve the highest customer satisfaction. Since our goal is to achieve maximum customer satisfaction, we continuously seek to achieve higher performance levels in the design phase for all future units.

Ductless Mini-Split systems are one of the fastest growing products in the US and popularity is rapidly increasing. They allow air conditioning and heating systems to be added quickly, economically and conveniently, often for some applications where installing comfort systems didn't seem possible or practical.

Flexibility is the main driver of their popularity. Klimaire ductless systems are simple, reliable, easy to install, and extremely affordable. Klimaire slim single zone and multi zone ductless systems offer built-in solutions with duct free technology benefits. These systems are integrated with innovative inverter technology providing individual comfort and control. With our KSIV series we are committed to bring our valued customers additional savings with a unit almost ready to install, easily and quickly, with minimum HVAC technician assistance.

How much do you spend for heating & cooling your home?

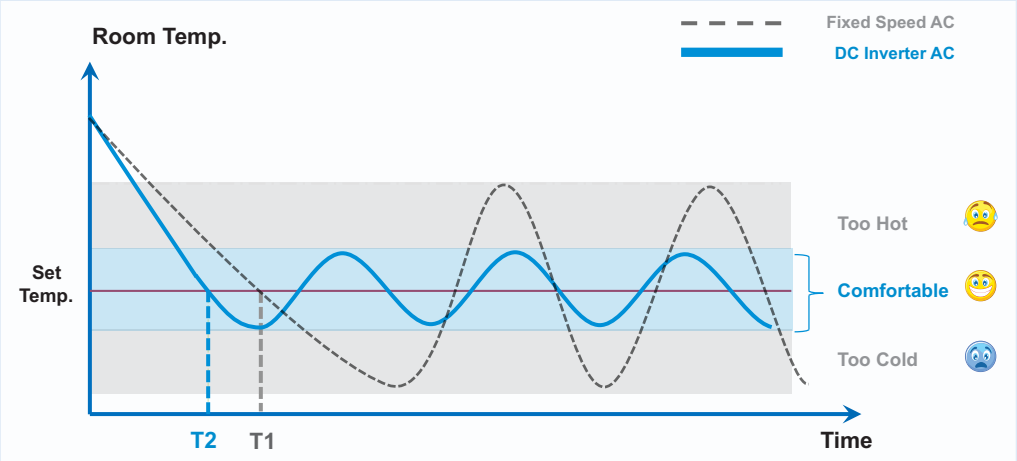
The US Department of Energy (DOE) says that as much as half of the energy used in your home goes to heating and cooling. So making smart decisions about your home's heating, ventilating, and air conditioning (HVAC) system can have a big effect on your utility bills and your comfort.



Klimaire ***Invertech*** DC Inverter - driven ductless air conditioners and heat pumps can save you up to 33% on your power utility bill when compared with room air conditioners or standard efficiency ductless systems. Ductless Invertech units are practical to install and preferred over traditional ducted central units.Additionally, because there is little or no ducting, the energy losses proper of ducted systems are non-existent. Total savings can reach up to 49% when heat pump technology is combined with an inverter system.

What is Klimaire DC Inverter?

Klimaire DC Inverter Air Conditioners are the ultimate cooling and heating technology of the HVAC field. They are called “DC inverter” because the alternative current (AC) is converted to Direct Current (DC) then, direct current inverted back to Alternative current with desired frequency. As known, the current supplied through the wall outlet has fixed frequency which is 60 Hertz. Different frequencies supplied to the compressor will result different running speeds of the compressor.
Klimaire Inverter control systems use Pulse Amplitude Modulation (PAM) that is the most advanced and energy efficient method of inverting the current.
DC Inverter air conditioners bear special compressors that their speed could be changed by increasing or decreasing the frequency of the supplied power.
Therefore, unlike conventional split Air Contioners/Heat Pumps which cycle between on and off repeatedly, the DC Inverter control system will monitor the room temperature and adjust the compressor speed automatically.
Conventional compressors turn on and off to maintain the room temperature at desired level. This will result compressor to draw tremendous energy each time it starts up. This will also reduce the life-span of the compressor and other components that are turning on and off.
Once a conventional system is running, it runs at its maximum speed, consuming the maximum amount of energy in order to produce the maximum of cooling or heating to maintain the desired temperature. The system will then cycle between on and off in an effort to maintain this temperature.
When a DC Inverter compressor initially starts up, it runs with a higher speed to bring the room temperature to desired level rapidly, Once the set temperature is reached, it slows down and adjust its capacity just to counter the heat loss or heat gain of the building. By this way it will maintain a constant temperature.

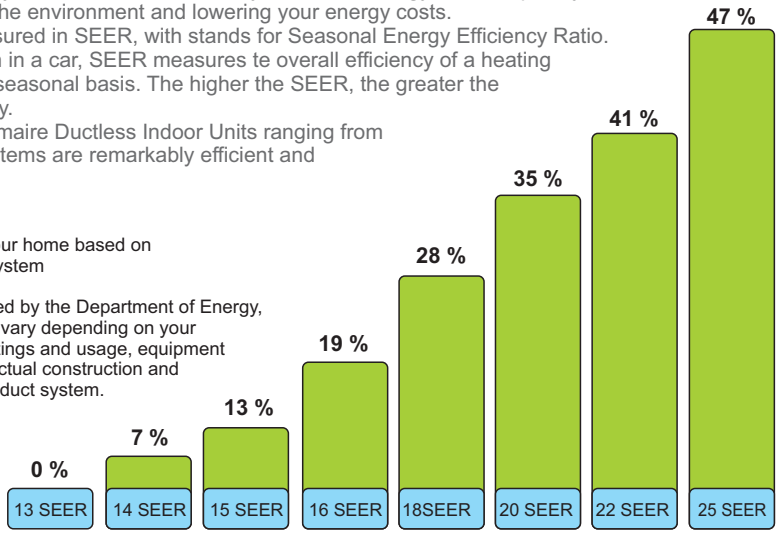


The higher the efficiency, the higher your savings

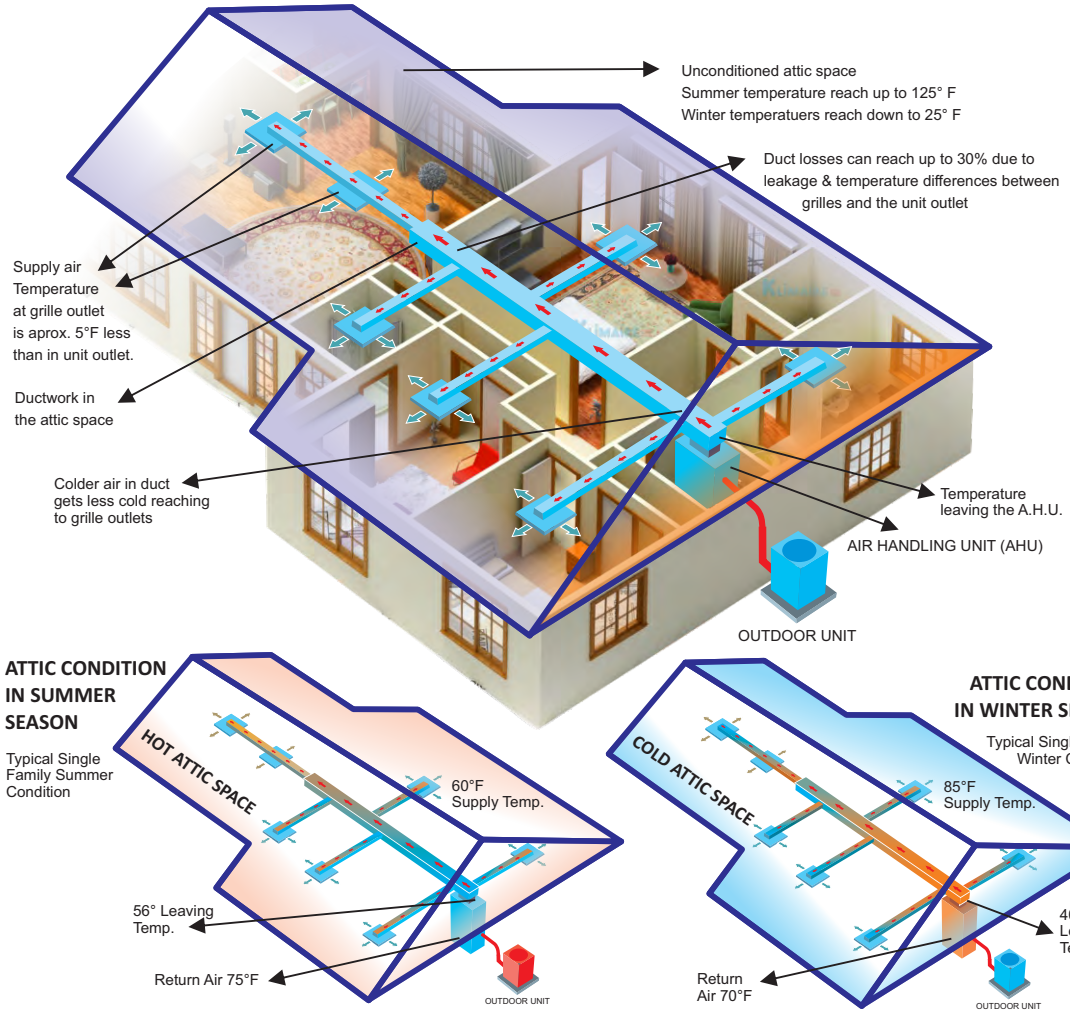
You´ll save energy everytime you use a Klimaire Ductless System.
Air ducts from a central forced air system can lose energy, with air leakage specially if the ducts run through unconditioned areas like attics or basements.
Since Klimaire Ductless Systems have no ducts, they avoid that energy loss completely, reducing your impact on the environment and lowering your energy costs.
System efficiency is measured in SEER, with stands for Seasonal Energy Efficiency Ratio. Similar to miles per gallon in a car, SEER measures te overall efficiency of a heating and cooling system on a seasonal basis. The higher the SEER, the greater the system´s energy efficiency.
With SEER ratings for Klimaire Ductless Indoor Units ranging from 14 to 25, our ductless systems are remarkably efficient and environmentally friendly.

Annual savings for cooling your home based on the efficiency of a matched system

Minimum efficiency established by the Department of Energy, Potenial energy savings may vary depending on your personal lifestyle, system settings and usage, equipment maintenance, local climate, actual construction and installation of equipment and duct system.



Ducted Systems Vs Ductless Systems



Summary: Duct Losses Can Be Over 30%

Ductless Mini-split

Personalized Comfort Solution

Experience true individual comfort. Ductless Mini-Split systems are the perfect solution to a variety of installation challenges. Ductless Mini-Split units eliminate the use of ductwork, allowing installers the ability to place these units in locations that were previously considered impractical or impossible due to additional ducting and cost associated with installing a regular unit. Ductless Mini-Splits consist of two parts, an outdoor unit and an indoor unit, similar to regular split units, but much smaller in size. The outdoor and indoor units are connected to each other by refrigerant and electrical lines. They run together with a condensate drain line through a small hole in an exterior wall, generally 3 inch in diameter or less. In addition to eliminating the need for ducting, another great advantage of Ductless Mini-Split systems is true zone control. The indoor fan coil unit is dedicated to the room being conditioned, allowing a temperature and humidity level to be kept in a specific room, separate from the rest of the house or building.

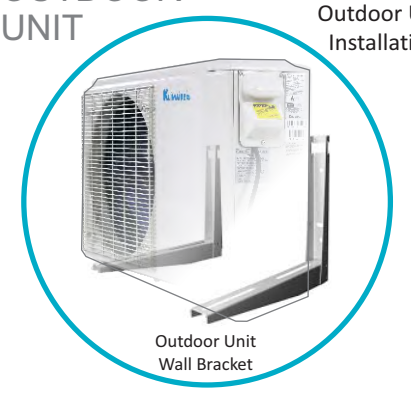
INDOOR UNIT

OUTDOOR UNIT

Optional Outdoor Unit Installation



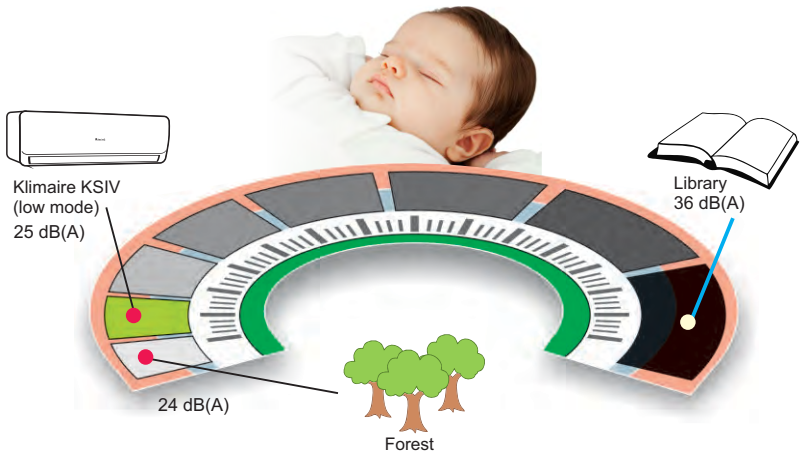
Quiet Operation

- Low Noise Design
- Optimize air discharge vane

Max Decrease **3.5dB(A)**

- Silent Mode

Indoor fan run at an extra breeze

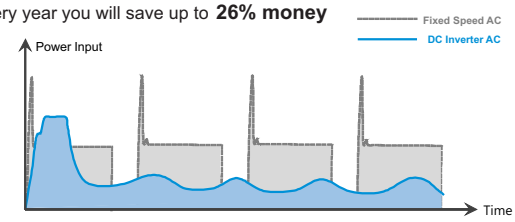


Energy Savings

Save 26%

- Inverter Saving

Every year you will save up to **26% money**



Example: Unit of 12000Btu/h (cooling capacity)

	Fixed Speed	Inverter
SEER	13	21
Cooling cost	$114	$73
Heating costs	$258	$202
Total	$372	$275

- According to AHRI , refer https:// www.ahridirectory.org for detail

Indoor Air Quality Self Cleaning

Your Klimaire KSIV series equiped with Auto Clean Function. It cleans and dries the evaporator to prevent mildew grow and keep it fresh for next operation.

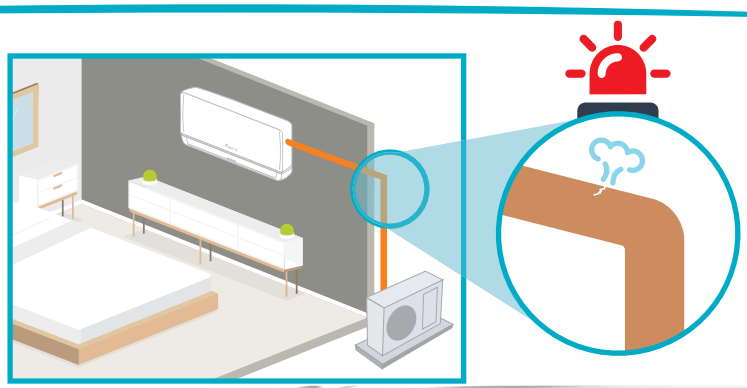
Operation	Low Fan Only	Heating & Low Fan	Low Fan Only
Time (minute)	1-13	14	15-16

Air Filtration

Washable primary filter captures dust sizes over 10 nm

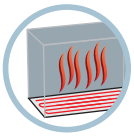
Refrigerant Leakage Detection

* You will be alerted when refrigerant is low.
* Preventes damage to the compressor
* Automatically turns off the unit



Reliability

Base Pan Heater



Prevents defrost condensation from freezing ensuring proper defrost drainage during heating season to improve efficiency

Compressor Heater

Ensures Compressor longevity and reliability

Golden Fin

The unique anti-corrosive golden coating on the condenser coil can withstand the salty air rain and other corrosive elements.

Low Ambient Cooling

The air conditioner can run in cooling mode even when the outdoor ambient temperature is down to 5º F

Emergency Use

When temperature sensor error happens, the air conditioner will display error code and stop inmediately, while Klimaire AC will display error and continue running in a proper status, to avoid the case that AC is in urgent need.

Service Friendly

* Emergency Function Using

- Manual Switch Button
- ✓ Easy to turn on/off without a tool.
- Emergency Using Function
- ✓ Smartly detecting errors, your unit **keeps running** when in urgent need

Ordinary

KSIV SERIES

Easy Installation

Installation gap for pipe connection > 4 in. Normally about 3 in. It is easier to connect the pipe.

Installation position from right to left, more than 2 in. Installer does not need to find the mounted plate.

Multi-refrigerant outlet pipe method: left/right/rear, more flexible for installation.

Control Options:

Wherever you use the KSIV series either residential or commercial variety of control options are available

Wireless I- Remote Control

(Standard)

User friendly infrared wireless remote control with convenient and easy to read large LCD display, and function buttons clearly marked easy to set your preferred setting.

Wi-Fi Smart LCD

(Optional)

Klimaire Smart AC Controllers are loaded with an array of smart features to maximize your convenience and help you save the air conditioning costs.

Wi-Fi USB

(Optional)

Klimare Smart Kit Lets you control your ductless mini split AC using your smart phone or tablet.

Remote Control

1 ON/OFF Button
This button turns the air conditioner ON and OFF.

2 MODE Button
Press this button to modify the air conditioner mode in a sequence of following:

AUTO → COOL → DRY → HEAT → FAN

***NOTE**: Please do not select HEAT mode if the machine you purchased is cooling only type. Heat mode is not supported by the cooling only appliance.*

3 FAN Button
Used to select the fan speed in four steps:

AUTO → LOW → MED → HIGH

***NOTE:** You can not switch the fan speed in AUTO or DRY mode.*

4 SLEEP Button
- Active/Disable sleep function. It can maintain the most comfortable temperature and save energy. This function is available on COOL, HEAT or AUTO mode only .
- For the detail, see “sleep operation” in “USER´S MANUAL”.

NOTE: *While the unit is running under SLEEP mode, it would be cancelled if MODE, FAN SPEED or ON/OFF button is pressed.*

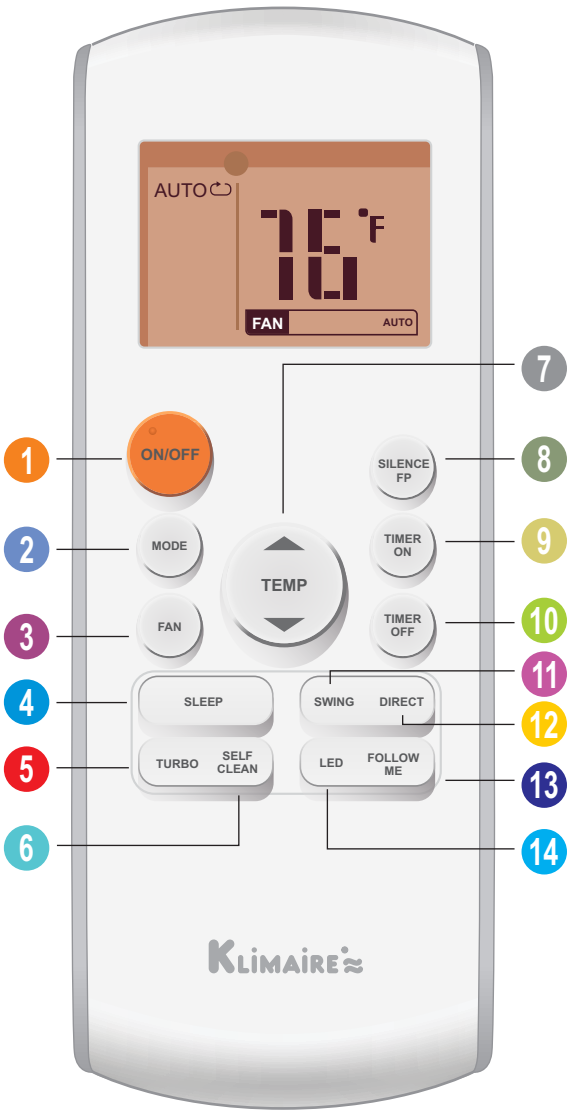
5 TURBO Button
Active/Disable Turbo function. Turbo function enables the unit to reach the preset temperature at cooling or heating operation in the shortest time (if the indoor unit does not support this function, there is no corresponding operation happened when pressing this button.)

6 SELF CLEAN Button
Active/Disable Self Clean function. Under SELF CLEAN mode, the air conditioner will automatically clean and dry the Evaporator and keep it as fresh for the next operation.

7 UP Button (▲)
Push this button to increase the indoor temperature setting in 1F increments to 86ºF.

DOWN Button (▼)
Push this button to decrease the indoor temperature setting in 1ºF increments to 62ºF.
NOTE: Temperature contol is not available in Fan mode.

NOTE: Press and hold UP and DOWN buttons together for 3 seconds will alternate the temperature display between the ºC & ºF scale.



Remote Control & Wall Holder

8 SILENCE/FP Button
- Active/Disable SILENCE function. If pushing more than 2 seconds, the “FP” function will be activated, pushing more than 2 seconds again to disable.
- When the Silence function is activated, the compressor will operate at low frequency and the indoor unit will bring faint breeze, which will reduce the noise to the lowest level and creat a quiet and comfortable room for you. Due to low frequency operation of compressor, it may result in insufficient cooling and heating capacity.
- Activates/Disables freeze protection”FP” or HOME-AWAY function. It can only be activated during the heating operation. (only when the setting mode is HEAT). The unit will operate at high fan speed with the temperature automatically set to 46 F. The display window of indoor unit will display FP. For the unit without display area, the Defrost indicator light will be keeping on for 2 seconds Keeps the room over freezing temperature.

9 TIMER ON Button
Press this button to initiate the auto-on time sequence. Each press will increase the auto-timed setting in 30 minutes increments. When the setting time displays 10.0, each press will increase the auto-timed setting 60 minutes increments. To cancel the auto-timed program, simply adjust the auto-on time to 0.0.

10 TIMER OFF Button
Press this button to initiate the auto-off time sequence. Each press will increase the auto -timed setting in 30 minutes increments. When the setting time displays 10.0, each press will increase the auto-timed setting 60 minutes increments. To cancel the auto-timed program, simply adjust the auto-off time to 0.0

11 SWING Button
Used to stop or start horizontal louver auto swing feature.

12 DIRECT Button
Used to change the louver movement and set the desired up/down air flow direction. The louver changes 6° in angle for each press.

13 FOLLOW ME Button
Push this button to initiate the Follow Me feature, the remote display is actual temperature at its location. The remote control will send this signal to the air conditioner every 3 minutes interval until press the Follow Me button again. The air conditioner will cancel the Follow Me feature automatically if it does not receive the signal during any 7 minutes interval.

14 LED Button
Disable/Active indoor screen Display. When pushing the button, the indoor screen display is cleared, press it again to light the display.

Overview

Klimaire KSIV 19 SEER mini split heat pump systems offer extraordinary features. This type of air conditioners/heat pumps is ideal for small spaces calling for spot cooling or heating. The wall-mounted fan coils are simple to install and placed high on a wall where they operate quietly and blend into the room decor.

Klimaire slim and elegant single zone ductless systems provide the cooling or heating capacity for areas consider so far hard to condition , and are ideal for small spaces, or detached rooms application, where there is not enough floor space, or ceiling, or the attic is not suitable for additional ductwork. The outdoor unit is pre-charged to accomodate up to 25 ft of refrigerant tubing.

Comfort Features

Self Cleaning

Operating the using this function will clean and dry the evaporator to prevent mildew growth and keep it fresh for next operation.

Turbo Operation

When the air conditioner goes into this mode maximizes the cooling or heating capacity output cooling down or heating up the room fast.

Sleep mode

On this function, the unit automatically adjusts the temperature setting by 1.8 ºF per hour for the first two hours, then holds it steady for the next 5 hours, then switches off for all-night comfort.

Auto re-start & memory function

If the power fails, no settings will be lost. When the power resumes, the air conditioner will restart with the previous function setting automatically, eliminating the need for re-programming.

Dry mode

The individual dehumidification mode efficiently helps to control humidity level when cooling may not be necessary by sensing the room temperature and shutting down the comressor to avoid overcooling the rooms.

46ºF Heating

In heating operation, the preset temperature of the air conditioner can be as low as 46°F which keeps the room temperature steady at 46°F and prevents the house from freezing when it is unoccupied for a long time in severe cold weather.

High Density Filter

Captures smog, absorbs bad smells, decompose formaldehyde,removes micro-dust and releases vitamin C to clean and refresh the air

Auto level swing

Distributes cool/warm air to a maximum area by moving flaps automatically.

Air direction

Since cold air and warm air density is different, in cooling mode the indoor unit blows air horizontally, while downwards in heating mode. This technology makes the room temperature more consistent and comfortable during operation.

Anti-cold air (Heat Pump Only)

(Heat pump only) When starting the heating operation, the fan speed is automatically regulated from the lowest level to the pre-set level according to the temperature rising of the evaporator. This function prevents cold air from blowing out at the beginning of the operation, avoiding discomfort to the user.

Temperature Compensation

Changes the fan speed to 3 different settings to accommodate user's needs. It also helps to control humidity level when cooling may not be necessary.

Energy Saving

KSIV ductless mini split systems can be an energy-saving, cost-effective solution for a variety of applications:

Sleep Mode

Standard Features

Auto Restart Function

Timer

Turbo Mode

Self Clean Operation

Follow Me

Anti-cold Air Function

Self-diagnosis and Auto-protection

Auto Defrosting

Emergency Using Function

Refrigerant Leakage Detect

High Density Filter

Two-directional Airflow

Temperature Compensation

Louver Position Memory Function

Manual Switch Button

Fire-proof Electric Box

Auto Swing

46ºF Heating

Convenience

2 Way Draining

Multi-outlet – The refrigerant tubes and the water outlet can be installed either on the right or the left side of the unit for installation flexibility.

Washable Filter

The indoor unit filters can be taken out and easily washed to keep air clean all the time.

Auto Re-start

The air conditioner memorizes the operation settings and when there is a power outage it will start up using these settings when the power is reestablished.

Wi-Fi Ready (Optional Smart Kit)

KSIV Series are built with Wifi capability once the optional Smart Kit USB plug-in.

Timer

The air conditioner can be turned on or off at any set time in a 24 hour period.

Louver Position Memory

With the hydrophilic aluminum fins the cooling efficiency of the AC will be improved by accelerating the condensed water flow between the fins. In the outdoor unit it improves the heating efficiency by accelerating the defrost process.

Wi-Fi Capability (Optional)

Control Your Klimaire® Mini-Split From Anywhere

How does it work?

iOS or Android APP

The mini-splits are controlled from a webpage or using an iOS or Android APP in a very intuitive way.

Smart Kit (Wi-Fi)

An optional Smart Kit (Wi-Fi) device installed in each unit controls the operation.

Cloud Managed

A Server in the cloud manages the whole process.

Wi Fi Control Features

Optional Smart Kit

To have remote access to control your Klimaire unit, optional smart kit should be installed.

Turn on/off mini-split

Turn your A/C on/off as you wish

Change Program Settings

Change the program settings, such fan speed, temperature, and operation mode

Temperature Home

Monitor current room temperature, set timer on/off activate frost protection and sleep timer.

Check AC

Check AC running status and display detailed information

Program Calendar

Program the mini-split with a calendar scheduler in an easy, intuitive way.

Save Money

Save money without losing comfort.

Remotely managed

Remotely manage your mini-split system using a simple smartphone, tablet or PC via the Internet.

Your Klimaire Wi-Fi enabled air conditioner lets you control your ductless mini split air conditioner using your smartphone or tablet from anywhere internet connection is available. Our free IOS and Android smartphone app gives you the freedom to instantly adjust your settings saving you time and money on energy consumption and cost.

Optional Smart Kit

Standard Wi-Fi b/g/n router
